	Categoría	Descripcion
Missing CSRF Token	csrf	A POST form was found without a visible CSRF token. This may allow cross-site request forgery attacks. This form handles passwords, emails, and other sensitive information.
Missing Strict-Transport-Security Header	headers	HSTS header is missing. The site does not enforce HTTPS connections.
Missing Content-Security-Policy Header	headers	CSP header is missing. The site is vulnerable to XSS attacks.
Missing X-Content-Type-Options Header	headers	X-Content-Type-Options header is missing. Browser may MIME-sniff responses.
Missing X-Frame-Options Header	headers	X-Frame-Options header is missing. Site may be vulnerable to clickjacking.
Mixed Content	mixed_content	Page loaded over HTTPS may reference HTTP resources.
Missing SPF Record	dns	No SPF record found. Email spoofing may be possible.
Missing DMARC Record	dns	No DMARC record found. Email authentication is not enforced.
Missing X-Frame-Options Header	clickjacking	Neither X-Frame-Options nor CSP frame-ancestors is set. An attacker could embed this page in an iframe to trick users into unintended actions.
Cache Response Without Vary Header	cache_poisoning	The response is served from a cache but does not include a Vary header. Unkeyed headers may poison cached responses served to other users.
Rate Limiting Detected on Login	auth	The login page response does not include rate-limiting headers, which may allow brute-force attacks.
Missing HSTS Header	subdomain	Subdomain panel.fbennassar.dev is missing the HSTS header.
